

ANGELIKA MAZUREK

UX DESIGN CANDIDATE | HEALTHCARE, SOFTWARE ENGINEERING & AI BACKGROUND

Los Angeles, CA (Open to New York, NY) | [linkedin.com/in/angelmaz](https://www.linkedin.com/in/angelmaz) | angelika.a.mazurek@gmail.com

SUMMARY

Career-transitioning UX design candidate with a background in healthcare and full-stack software engineering. Hands-on experience empathizing with users, defining pain points and needs, creating low- and high-fidelity Figma prototypes, testing designs with users, and iterating based on feedback. Brings cross-functional collaboration, accessibility awareness, problem-solving, organizational skills, and hands-on experience with responsible AI and human-centered product design.

CORE COMPETENCIES

UX & Product Design: Human-Centered Design (HCD), User Needs & Pain Points, User Research, Usability Testing, User Feedback, Figma, Wireframing, Low-/High-Fidelity Prototyping, Information Architecture, Interaction Design

Collaboration & Systems: Cross-Functional Collaboration, Organizational Skills, Workflow Analysis, Accessibility Awareness, Problem Solving, Critical Thinking, Customer Service, Technical Communication

AI & Technical: Responsible AI, Google Workspace, Human-in-the-Loop Validation, Label Studio, HTML5/CSS3, JavaScript, Python, Flask, PostgreSQL, Git/GitHub

PROFESSIONAL EXPERIENCE

CheckCells, Inc.

Product Development & AI Validation Contributor

Los Angeles, CA

Jan 2026 - Jun 2026

- Partnered with engineering to test laboratory software workflows, identify usability issues and user friction, report findings, and retest updated builds.
- Contributed to four hardware prototype iterations of an optical diagnostic station, improving manual focus calibration, sample slide stability, and four-chamber physical wayfinding.
- Performed human-in-the-loop computer vision validation by comparing model detections with manual reference counts and annotating approx. 500 images/video frames in Label Studio.
- Co-authored user-facing Instructions for Use (IFU) and laboratory workflow documentation covering sample preparation, device operation, quality review, and cleaning procedures.

Nasza Klinika

Medical Director Assistant

Warsaw, Poland

2016 - 2018

- Analyzed operational clinical workflows and patient intake pipelines to identify friction and support more efficient treatment delivery and interdisciplinary coordination.
- Developed firsthand understanding of accessibility needs, varied user capabilities, and the importance of clear workflows in high-stakes healthcare environments.

Bielański Hospital (Dept. of Neurology)

Neurology Physiotherapist

Warsaw, Poland

2013 - 2016

- Delivered patient-centered rehabilitation within multidisciplinary care teams and facilitated physiotherapy student training and cross-functional team communication.

SELECTED UX CASE STUDIES & PROJECTS

TaskApp: Task Organization, Information Architecture & Interaction Design | Google UX Certificate

Conducted exploratory user research to identify user needs and pain points, defined a persona and screen architecture, ideated design solutions, and created low- and high-fidelity prototypes in Figma. Usability feedback revealed friction in task creation and category assignment, so the prototype was iterated to make filtering and task organization more explicit.

MoodBridge 2.0: Ethical Intelligence-Augmentation System | Stanford Online Capstone

Designed a mixed-initiative AI interaction model with Accept / Modify / Skip controls, prioritizing user agency, decision-fatigue reduction, and responsible AI boundaries.

Flying Recipes: Cross-System Recipe Conversion & Scaling | Live: flying.recipes

Designed and engineered a full-stack web application (Python, Flask, PostgreSQL, JS) that reduces conversion friction for European home cooks in the U.S.; created mobile-first, glanceable ingredient layouts.

EDUCATION & CERTIFICATIONS

Stanford Online | UI/UX Design for AI Products (January 2026)

Google / Coursera | Google UX Design Professional Certificate (In Progress)

Hackbright Academy | Software Engineering Fellowship: Full-Stack Python/JS (2023)

Medical University of Białystok | MSc in Physiotherapy (2008 - 2013)
